Vehicle maintenance checklist

Northway Auto · Bay 5, 7880 48 Ave, Red Deer, AB T4P 2B2 · +1 (825) 221-3120

Intervals are general guidelines. Always check your owner’s manual for your vehicle’s specific schedule, and follow the severe-service schedule if you do a lot of short trips, cold starts, or towing.

Every oil change (5,000-8,000 km conventional / 8,000-12,000 km synthetic)

- [ ] Oil and filter change
- [ ] Tire pressure and tread check
- [ ] Fluid levels (coolant, brake, power steering, washer)
- [ ] Visual brake inspection

Every 20,000-24,000 km

- [ ] Rotate tires
- [ ] Inspect brake pads and rotors
- [ ] Replace engine air filter
- [ ] Replace cabin air filter
- [ ] Check battery terminals and charge

Every 40,000-60,000 km

- [ ] Replace brake fluid
- [ ] Inspect suspension and steering components
- [ ] Wheel alignment check
- [ ] Inspect belts and hoses for wear or cracking

Every 60,000-100,000 km

- [ ] Replace transmission fluid (per manufacturer schedule)
- [ ] Replace coolant
- [ ] Replace spark plugs (iridium/platinum plugs can go longer)
- [ ] Inspect timing belt if equipped; replace per manufacturer interval

Every 4-5 years, regardless of mileage

- [ ] Test and replace battery as needed
- [ ] Replace wiper blades (more often as needed)

Before winter

- [ ] Switch to winter tires once temperatures consistently drop below 7°C
- [ ] Test battery (cold weather is hardest on an aging battery)
- [ ] Check antifreeze concentration
- [ ] Check heater and defrost function
